

Minotaur

THE LABYRINTHS OF CRETE

A Special Note on Playing Network Games of Minotaur

In order to play network Minotaur, each player must have a different version of Minotaur installed on their Mac. Look in the Minotaur folder on this CD, and you'll notice we've included seven different versions. Not to state the obvious, but that means you can play a network game with up to seven players.

To avoid crashing, we suggest that the host ask everyone to call out their version-number before a game begins. To show you how this is done, we've reproduced part of the transcript from a recent Minotaur match at Bungie Worldwide HQ:

Alex: "Hey Jason, what number do you have?"

Jason: "Number 5."

Alex: "Chucky?"

Chucky: "Number 4."

Alex: "Err...no good dude, I have number 4 too."

Chucky: "Then switch, fool."

Alex: "(CENSORED) me! I'm the host. You switch numbers!"

Chucky: "Oh yeah? Well you can (CENSORED) me too! Number 4 is my favorite!"

Jason: "It doesn't matter which number you have, chump. I'm gonna spank you anyway."

Alex: "Hee hee"

Chucky: "Fine, fine. I'll switch to number 2. Bunch of whining...(incoherent grumbling)"

Alex: "Sweet. Here we go...prepare to diiiiie!!!"

Jason: "BLAM!"

Got it? Good! Now grab the nearest sharp object, pull on that rusty suit of chainmail, and get ready to rock!
